## CAREER SUMMARY

---

An aspiring Web Developer with knowledge in both technical skills and creative design. I have a background in studying 3D animation and modeling, devoting myself to create engaging and beautiful looking experiences. My goals are to combine both my artistic and programming expertise and take them to the next level by creating interesting and interactive web experiences for users.

As a former 3D art and animation student who graduated with a Diploma in Game Art & Animation, and with a full-fledged Certificate in Full Stack Immersion, I know what it takes to make interesting and interactive web experiences.

Therefore, I am highly interested to combine both my skills as a Programmer and an Artist to contribute and make a strong impact to your team.

## KEY SKILLS

---

- HTML
- CSS3
- JavaScript
- React
- React Native
- Angular
- Node.js
- MongoDB
- Communication
- Typescript
- Test Driven Development
- Git/GitHub
